

Five Stages of Interview & Interrogation Techniques

Why Attend?

Most experienced interviewers know and realize if an admission is obtained from a suspect, that admission or statement will more than likely be challenged in court. Over the last few years, well known Interview & Interrogation Techniques have come under the microscope of criminal defense attorneys regarding the tactics used. Cases in both the United States and Canada are being thrown out due to some of these tactics.

Five Stages of Successful Interview Techniques has been designed to train individuals to conduct interviews following a structured interview approach. This process will teach the attendees how to learn better listening skills which in turn will result in obtaining more relevant information.

Five Stages of Successful Interview Techniques has been designed by an individual who has been conducting professional structured interviews for over 35 years. The principal instructor and creator of this course still actively conducts real life interviews on a regular basis. He conducts interviews for both law enforcement agencies and criminal defense attorneys which provides a unique insight to the world of interviewing.

The information taught in the **Five Stages of Successful Interview Techniques** will demonstrate to the attendees the importance of having patience and learning how to listen to the subject. The attendees will be taught how to obtain information, statements and confessions which will withstand a court challenge.

During the course of instruction, videos of interviews that the instructor has personally conducted will be used for training purposes. It should be noted that since these training tapes are real life situations, some of the material will be sensitive in nature.

Five Stages of Interview & Interrogation Techniques

Course Objectives:

Traits of Deception: Identify 18 traits researchers have identified which would challenge seasoned interviewers regarding detecting deception.

Types of Denial: Understanding reasons why and how people lie will assist the interviewer in developing information which can be used in the Review & Resolution Stage.

Basic Interview Theories: Simple theories will be explained and discussed which will allow the interviewer to understand interview concepts. These concepts will include Typical Interview Faux Pas, Setting Up the Room and Case Preparation.

Rapport Building: Learning How To Be A Good Listener will help establish empathy which is a crucial building block of rapport.

Five Stages of Successful Interviews: These stages will allow the interviewer to learn and develop a better formula of interviewing all suspects.

Analytical Disclosure Dialogue: These key critical questions will reveal answers which will allow the interviewer to analyze responses to these questions. The responses then can be categorized as being typically acceptable or unacceptable responses.

Improving Listening Skills: Listening is an essential part of communication and is different from hearing. Being a good and patient listener will assist the interviewer to become more effective.

Assessing Verbal Responses: The key to successful interviews is to unlock what the person is saying in response to critical questions in addition to listening to the person's facts and circumstances surrounding the case.

Assessing Non-Verbal Behaviors: Recent research has shown that interviewers are being misled by non-verbal behavior. This area will focus on how to use observable body language to the benefit of the interviewer.
