

On-Target Forensics, LLC

Forensic Crime Scene Technician

Professional Certification

1. Attendance and completion of the below listed technical seminar(s)

**EVIDENCE COLLECTION: CRIME SCENE TO COURTROOM BASICS:
Collection, Preservation, Legal Standards**

CRIME SCENE PHOTOGRAPHY: The Essentials

**EFFECTIVE CRIME SCENE REPORTING:
Documentation and Demonstratives**

2. Displayed application competency of in-class practical skill exercises.
3. Successful passing of written examination administered after the completion of above-referenced training unit(s).
4. Any awarded certification requires the person to have, and keep high ethical, integrity, and industry-based professional standards.
5. Continued good standing in law enforcement-related employment that involves crime scene-evidence analysis and/or processing, or the related subject matter education of future or current practitioners.
6. Certification is good for a two-year period. Extension of the initial certification period can be carried out by completing 16 hours of other forensic subject matter training courses/seminars/webinars each year thereafter. Documentation substantiating this completed training must be kept by the individual and provided upon request.
7. All certified individuals are highly encouraged to subscribe to one or more available forensic trade publications along with membership in forensic peer/professional organizations to support and expand technical knowledge levels achieved.
8. Certification will be automatically revoked upon proof of malfeasance, criminal conviction, etc.
