Members and Agencies,

Mr. STEWARTS

Our mission statement was pretty simple: public safety, public safety.

I would like to thank and congratulate all the agencies and individuals who worked together to make the Old Shawneetown Bike Rally a safe and successful event. All the credit goes to those involved in the pre-planning of and response to this event. I am proud to have been a part of the team. Other agencies can use this as a case study on how to pre-plan an event. NIMS works.

Who would have thought that private, local, state and federal agencies could all work together flawlessly?

We all heard many times from those attending the rally that they felt more safe this year than in past years. This makes all the work that much more gratifying. Gallatin Co. EMA is already looking forward to next year's event with hopes of temperatures in the mere 80's.

Again, thank you for your participation, involvement, and dedication to making this event a safe and successful one.

Sincerely,

Steve J. Galt
