

ILEAS Issue Document

Governing Board Meeting

January 28, 2015

New Board Members

IL Association of Chiefs of Police Representative - Chief Eric Smith retired at the end of 2015. ILACP President Frank Kaminski appointed Macomb Police Chief Curt Barker to be the Chiefs' Association representative to the ILEAS Governing Board.

Region 2 Co-Chair Mark Curran Alternate – Lake County Sheriff's Office Command Jim Elliot has been appointed by Sheriff Mark Curran as his Region 2 Co-Chair delegate. Jim Elliot was previously the ILEAS RPC for Northern Cook and Lake County.

MABAS – The previous MABAS representative, Mike Dille is no longer employed with MABAS. His replacement, Mike Forrest, has been appointed by MABAS CEO Jay Reardon. Mike is the Operations Branch Chief for East Central Illinois.

IL-TERT/NWCDS – Cindy Barbera-Brelle has retired. Her replacement as the representative for Northwest Central Dispatch (NWCDS) and IL-TERT is John Ferraro. Mr. Ferraro is the new Director of NWCDS.

Chicago PD Vacancy – Since Chief Wayne Gulliford retired from Chicago PD, there is a vacancy for CPD.

Requested Board Action

No action from the Board is requested.

Jimmy Lee Resignation

Jimmy Lee has been a Regional Planning Coordinator for several years. He began his law enforcement career in the United States Army Military Police as a Military Police Investigator and a Narcotics Investigator with the Joint Drug Suppression Team at Fort Campbell, Kentucky. After his military service he was hired by the Village of Roselle as a police officer and retired as a Deputy Chief of Police. He is a graduate of the Northwestern Center for Public Safety Staff and Command (75th Session) and the FBI National Academy (179th Session).

Jimmy has been a valuable member of the ILEAS team as our representative in DuPage and Central Cook Counties. He resigned to take a position as the new Deputy Chief of Police at Fox Lake working under the new chief, Russell Laine. We wish Jimmy well in his future endeavors.

2015 Financial Audit

Pursuant to grant rules and other legal requirements ILEAS annually participates in a financial audit. The licensed auditor that ILEAS utilizes is Legg and Legg, LLP from Springfield. The most recent audit was completed in December of 2015. ILEAS received a favorable audit for 2015. Jim Legg will be present at the Board meeting to discuss the audit and to answer any questions that the Board may have. A copy of the audit will be available at the Board meeting.

Requested Board Action

No action from the Board is requested.

Communications Grants

At the last governing Board meeting, the Board approved the acceptance of the FFY14 grants transferred from Wauconda Fire to ILEAS by ITTF. ILEAS now has a total of **\$1.24** million directed towards communications. These grants expire at different times. ILEAS staff has been working on the development of an overarching interoperable communications plan. A draft of that plan is completed and pending review by IEMA Director Joseph before publication. This plan contains strategies for:

- Accounts for the budget for the StarCom21 access fees through June 30, 2017 for all ITTF issued radios.
 - Currently there are 3,788 access licenses
 - ILEAS negotiated the reduction in licenses from 3,788 to 2,500.
 - The cost for those access fees went from approximately \$440,000 to \$300,000
- The development of Technology Support Teams that will be deployable to major events to assist and support local agencies with interoperability issues when there are mutual aid and multi-disciplinary resources participating
- Restructuring of the oversight of interoperable communications and technological committees and work groups so that policy and strategies are more consistent and coherent.
 - This includes the merger of the FirstNet and the Communications functions into one group working together
- The implementation of a communications and technology focused curriculum at the ILEAS conference
- Complete inventory of all ITTF-purchased radio equipment and transfer of some assets to ILEAS for sub-recipient monitoring
 - All of these resources will be in an online database accessible by a variety of responsible entities.

ILEAS staff will receive input and make modifications based on that input from Director Joseph. Once that is accomplished, then the plan will be widely distributed in order to gain buy-in and further input. This plan will also be a guide for any necessary modification of the FFY 14 and 15 grants.

StarCom21 User Fees

As described above, ILEAS has negotiated an agreement with Motorola for StarCom21 access fees. The final deal is as follows:

- 3,788 current licenses extended **at no charge** to March 31, 2016
- 2,500 of those radios will be renewed from April 1, 2016 through March 31, 2017 @ \$120/year each for a total cost of **\$300,000**
- Motorola will provide, **at no cost**, access for those same 2,500 radios from April 1, 2017 until June 30, 2017.

In the December 2015 meeting, the Board authorized the expenditure of \$354,906 for StarCom21 access fees. The final negotiated budget for 17 months will be \$300,000 – 15% less than anticipated.

Built into this arrangement are 2,500 200 StarCom21 accounts for individual local agencies. ILEAS' proposal is that the State provides support for two radios per county. There will be 1,228 radios whose access fees of \$120 per year will no longer be supported by ITTF. The ILEAS staff has developed a proposal for what to do with those radios. This proposal will be discussed and voted on at the January 27, 2016 meeting of ITTF.

1. All agencies will get written notice of the termination of access fee payment.
2. Each agency will be given the choice to keep the radio if it agrees to pick up the access fee cost.
3. If it chooses not to, ITTF will request that they surrender the radios.
That stockpile of radios will be offered to any agency that is already a StarCom21 user agency or wants to become one and does not have the funds to purchase the equipment but can afford the access fees.

4. Any radios remaining will be available to be used as a trade-in for newer equipment from Motorola in an agreement to be negotiated later.

As of this writing, a motion is on the floor at January 27th ITTF meeting for approval from ITTF.

Requested Board Action

Staff requests that the Board authorize staff to continue the development and implementation of the Communications Plan as described.

Budget Adjustments

The budget adjustment section will be distributed in writing at the meeting. There are many issues that are bearing on what needs to be done. ITTF is currently determining how they are going to end the grant year which occurs on March 31, 2016. In previous years it was pro forma to request extensions to June 30th. This year, however, that may not be the case.

As Governing Board members may be aware, developing and implementing a budget for ILEAS is a moving target at all times. There always seems to be some factor outside of our control that either improves or degrades our plans. Since FY11, ILEAS has submitted budget proposals to cover one 12 month period at a time. In the spring of 2015, all ITTF committees were given around 30 days to develop a budget. Over 90% of the budget ILEAS submitted was approved for FY15 (which runs from April 2016 through March 2017). ILEAS was closing out spending on FY2013 at that time and beginning to spend the FY 2014 grants. However, ITTF transferred several hundred thousand dollars to ILEAS to pay for special teams' overtime/backfill coming from other sources of remaining FY13. This created a budget surplus.

As the FY14 budget comes to a close on March 31, 2016, ILEAS has unspent funds because of the aforementioned FY 13 money as well as other factors. As per standard practice, ILEAS submitted extension requests to continue to spend our FY14 grant through the end of the State/ILEAS fiscal year on June 30th for staff salaries and overtime/backfill. ITTF has indicated that there may be fewer extensions approved meaning we may be in a position where FY14 money needs to be spent before March 31, 2016.

After ITTF meets on the day before the Governing Board meetings, staff will know more after that meeting and will provide a document summarizing the issue.

NIPAS & New Region 4 Mobile Field Force Team

As per policy, the Board approves anticipated purchases exceeding \$100,000.

NIPAS Mobile Field Force and Region 4 Mobile Field Force Truck

As has been discussed by the Board in the past, ILEAS has discussed the status of the NIPAS Mobile Field Force as a statewide team. The board voted in April of 2015 to decertify the NIPAS team and request the two trucks be returned to ILEAS. Since then, NIPAS has re-approached ILEAS and requested that ILEAS revisit the issue. Jim Page has met with their representatives several times. Page and Larry Evans met again with them recently to further discuss the issue.

Page and Evans have also met both with the new Director of the Cook County Department of Homeland Security and Emergency Management (DHSEM) Ernest Brown. Included in this meeting were Brown's senior staff and Michelle Hannekin from ITTF/IEMA. This meeting was very productive and positive. Cook County DHSEM has officially changed its position to support ILEAS creating a Region 4 Mobile Field Force to cover the agencies that are in DuPage and Cook that are NOT NIPAS members. Currently, ILEAS, DHSEM and

ITTF/ILEMA are working out the financial arrangements. Final approval of ILEAS receiving retained UASI funds directly from ITTF is pending from FEMA.

Given this development, ILEAS staff recommends moving ahead to form a new Mobile Field Force team in DuPage/Central & Northern Cook and Lake Counties. ILEAS would open up membership to non-NIPAS agencies in that area. The Team would be based in Cook County since UASI funds are being utilized to create and maintain it.

After all considerations and discussions, ILEAS staff recommends that:

1. Using UASI funds a new Mobile Field Force team is formed in the Region 4 area to be based in Central/Northern Cook County. This team, entitled Region 4 North, would cover the DuPage, Central/Northern Cook and Lake Counties for agencies that are not currently covered by NIPAS.
2. The Region 4 South Mobile Field Force team would minimally expand its northern border inside Cook County.
3. ILEAS would open up membership to agencies in that area which are non-NIPAS agencies. ILEAS would NOT recruit current NIPAS agencies to join.
4. ILEAS would approach NIPAS to enter into an MOU outlining the procedures to be used when the teams work together or if there is a need for mutual aid between NIPAS Mobile Field Force and other Mobile Field Force teams in Illinois.
5. Once the MOU is executed, ILEAS would transfer ownership of the currently held equipment – including the two trucks they already possess - to NIPAS Mobile Field Force for their use.

On January 25th, ITTF notified ILEAS that they have \$274,000 of FY14 unused UASI funds dedicated in a budget for ILEAS to start the new Region 4 Mobile Field Force team. They are awaiting FEMA approval to redirect the funds to ILEAS.

Therefore, this remains a fluid situation. Until the funding arrangement is approved at the Federal level, ILEAS should not officially begin the process. The other limiting factor is that some of the funds being used are from FY14 UASI which will be expiring in a few months. The following recommendation is being made contingent on FEMA and State of Illinois approval of the funding changes. ILEAS staff is recommending the Governing Board act now so that once (if) the funds are approved, staff can expedite the acquisitions before the grants expire.

At the next Board meeting, the Federal/State decisions will have been made and can be reported and a budget adjustment can be approved at that time. However, the one thing that cannot wait until that meeting is the purchase of a Mobile Field Force truck for the new team. That is the only purchase over \$100,000 which requires Governing Board approval.

Requested Board Action

Staff is requesting that the Board approve the purchase of a Mobile Field Force truck for the Region 4 North team at a cost not to exceed \$150,000 AND only if the funding becomes available.

WMD Special Response Team Review

Over the last two years, there have been several discussions on different levels about the efficacy of the WMD Special Response Teams. This section briefly outlines the issues that should be discussed at the Board level over the next couple of months.

The idea of the WMD teams came out of an exercise at the State Fairgrounds where a suspect had contaminated an area but was still active. Only the fire agencies had the gear to enter the building but they did not want to because the suspect was armed. The cops could deal with the suspect but did not have the gear or training to operate in a contaminated environment. The solution of that problem was the creation of the State's WMD team (SWMD). Given that was only one team and could not respond immediately, ITTF requested that ILEAS create Regional Containment Teams. The Regional Containment Teams were SWAT operators who would "hold the line" until the SWMD Team arrived. During exercises it became clear that that the Regional Containment Teams could not really contain anything as they had to stay outside of the "warm" zone because they needed HazMat gear to be close. They morphed into what is known now as Regional WMD Special Response Teams.

ILEAS currently has eight WMD Special Response Teams:

Region 2	Region 3	Region 4	NIPAS
Region 6	Region 6/7	Region 8	Region 9/11

Some of these teams provide regional response capabilities over a large area for standard SWAT activations – most notably NIPAS, Regions 8 and 9/11. Many of these teams have never been activated for a WMD event since their inception in 2004.

Staff is examining the efficacy of reducing the number of WMD Special Response Teams and utilizing the savings to support other multi-jurisdictional and regional SWAT teams. There would no longer be a need to train or equip the HAZZMAT portion of the mission for the lower level teams. Savings could also be transferred to more strategic investments such as the need to provide food, water, shelter for 72 hours for teams in the field.

This examination should be concluded by the time ITTF decides a budget so that the ILEAS budget can reflect the new approach next year. *****Please note – this request to review the WMD Special Response Teams has also been brought up by ITTF staff and has been discussed there as part of a broader review of how many teams of what kinds should there be given the threat Illinois faces today.***

Requested Board Action

Staff requests that the Governing Board discuss this proposal in detail and provide feedback so that staff can craft an appropriate budget proposal to ITTF.

New LEMAA Status

These are the significant agencies that have not signed the new LEMAA:

County Sheriffs	Agencies with over 50 sworn		State Agencies
McDonough and Mason	Maywood METRA	North Chicago Univ. of Chicago	IL. Dept. of Natural Resources

Requested Board Action

No action by the board is being requested.

Legislation

An update on ILEAS proposed legislation is as follows.

Making the Homeland Security Emergency Preparedness Trust Fund a "Continuing Appropriation"

ILEAS is proposing a modification to the enabling statute which created the Homeland Security Emergency Preparedness Trust Fund. The language added to this section mirrors the same language added to Section 24 of the Toll Highway Act because of the same reason which was based on a court decision. This language allows the State to continually provide funding for the Tollway independent of the State General Budget. ILEAS is proposing adding the same language to the Statute creating the Homeland Security Emergency Preparedness Trust Fund which consists entirely of non-State funds. Senator Daniel Bliss is planning on sponsoring this legislation. The bill language as submitted is (new language underlined):

(20 ILCS 3305/17.5)

Sec. 17.5. Homeland Security Emergency Preparedness Fund. The Homeland Security Emergency Preparedness Trust Fund is created as a federal trust fund in the State treasury. The Trust Fund shall be held separate and apart from all public moneys or funds of this State. All Homeland Security moneys received by the Agency under Section 17 from a federal department or agency shall be deposited into the Trust Fund. Interest earned by the investment or deposit of moneys accumulated in the Trust Fund shall be deposited into the Trust Fund. **The Trust Fund shall be considered always appropriated for the purposes of disbursements, as provided in this Section, and shall be paid out and disbursed only as provided herein, and shall not, at any time be appropriated or diverted to any other use or purpose.** The Agency is authorized to expend any moneys in the Trust Fund for the specific purposes established by the terms and conditions of the federal awards received by the Agency and in any amount that the Agency deems necessary to make grants and pay expenses in connection with its emergency management and preparedness programs.

Law Enforcement Mutual Aid Omnibus Bill

John Millner and Jim Page met with the Assistant Director of the Illinois legal Reference Bureau at the General Assembly to discuss the law enforcement mutual aid statutes. He agreed that they need some work. The suggestion was that this proposal hold off until the next session so that they can do more research on it and ILEAs can work more to garner support from the Chiefs' and Sheriffs' Associations.

Funding

The exact language that was submitted last year was also submitted this year. Millner suggested this because that is what the Fire Caucus approved. Chief Pat O'Connor, the legislative committee for the Chiefs' Association stated that since the language did not change, they would continue to support it. The language for the bill from last year is attached. Millner has lined up a bi-partisan group of sponsors in both chambers. Elaine Nekritz and Don Moffitt will co-sponsor in the House AND Tony Munoz and Pam Althoff in the Senate.

Drones

The language ILEAS is proposing to modify the Freedom From Drone Surveillance Act is as follows (underlines are the additions to the Act):

- (1) If a law enforcement agency is using a drone solely for law enforcement training purposes. Training must be conducted in a geographically confined and time-limited manner that will safeguard the privacy of individuals. The use of a drone under this paragraph (7) on private property requires lawful consent. The use of a drone under this paragraph (7) on lands, highways, roadways, or areas belonging to this State or political subdivisions of this State does not require a search warrant or consent to search. Any law enforcement agency operating a drone under this paragraph (7) shall make every reasonable attempt to only photograph the law enforcement training and avoid other areas or individuals.

(Source: P.A. 98-569, eff. 1-1-14; 98-831, eff. 1-1-15.)

(725 ILCS 167/20)

Sec. 20. Information retention. If a law enforcement agency uses a drone under Section 15 of this Act, the agency within 30 days shall destroy all information gathered by the drone, except that a supervisor at that agency may retain particular information if:

- (1) there is reasonable suspicion that the information contains evidence of criminal activity, or
- (2) the information is relevant to an ongoing investigation or pending criminal trial, or
- (3) the information is collected pursuant to Section 15.7

(Source: P.A. 98-569, eff. 1-1-14.)

(725 ILCS 167/25)

Sec. 25. Information disclosure. If a law enforcement agency uses a drone under Section 15 of this Act, the agency shall not disclose any information gathered by the drone, except that a supervisor of that agency may disclose particular information to another government agency, if (1) there is reasonable suspicion that the information contains evidence of criminal activity, or (2) the information is relevant to an ongoing investigation or pending criminal trial, or (3) in the case of training pursuant to Section 15.7.

(Source: P.A. 98-569, eff. 1-1-14.)

The entire bill is attached to this report. Millner has asked Senator Daniel Bliss to also sponsor this amendment.

All bill language has been submitted to the Chiefs' and Sheriffs' Associations and met with their approval.

Requested Board Action

Staff requests that the Board continue its authorization moving forward with these proposed bills under the supervision of the Executive Officers.

ILEAS Training Center Activity Report 2016

Upcoming Training and Workshop Events – 2016

January 26-28	WMD Advanced Tactical Operations
January 28	ILEAS Governing Board Meeting
January 28-29	IPCSA Executive Board Meeting

ILEAS Governing Board
Budget Adjustments – Supplemental Issues Document
January 28, 2016

Budget Situation

Depending on a final decision by ITTF staff, ILEAS may have to spend between approximately \$185,000 and \$410,000 in the next 60 days. The following is a summary of how this budget situation developed:

1. The FY13 grants expired on March 31, 2015.
2. There were "leftover funds" from other committee projects turned back into ITTF.
3. ITTF subsequently (in April and May of 2015) granted ILEAS a significant amount of those "leftover" funds to be spent by June 30, 2015. This has been a common annual practice.
4. ILEAS normally used those funds for OT/BF for special teams. The result of this was that ILEAS did not spend the anticipated FY14 OT/BF money for the April-June quarter.
5. ILEAS also had staff turnover and paid for some unanticipated bills with FirstNet funds which boosted the unspent funds even more. This will leave ILEAS with unspent funds from FY14 when the grant expires on March 31st.
6. As it has done in the past, ILEAS requested an extension until June 30th to expend those remaining funds on OT/BF and payroll costs.
7. ITTF chose a different policy this year and informed ILEAS and other committees that remaining funds would not automatically be given an extension. In fact, ITTF staff discouraged the use of those funds for personnel costs (payroll and OT/BF). ITTF informed us to have a plan to expend the funds on equipment.
8. ILEAS put together an equipment request list as shown below.
9. ITTF informed ILEAS yesterday that the final decision as to what will happen to that money will be made sometime "in the future." ITTF requested that ILEAS submit budgets for the following versions:
 - a. Extension request to be used for a combination of payroll; OR
 - b. A proposal to spend it entirely on equipment
 - c. Some combination thereof
10. When ILEAS submitted these versions, there has not been an answer on whether or not they would be approved.

The bottom line is that the historical practice is now changing and ILEAS is in a holding pattern with regard for a decision on how to spend – or not spend - anywhere upwards of \$410,000.

The finance and management staff has spent considerable time responding to requests and providing justifications, etc. We thought we would get an answer at the ITTF meeting yesterday in Springfield, but did not. Therefore, ILEAS is in a holding pattern for how to use the funds. In my estimation, three things could occur:

1. ITTF denies the request to spend the funds on OT/BF, payroll or equipment that was not in the original budget submission last year. The funds would expire and return to ITTF.
2. ITTF allows ILEAS to spend a portion of the funds on payroll out to June 30th but requires that we get equipment acquisitions approved and completed by March 31st.
3. ITTF approves the equipment acquisition and gives ILEAS the extension to get them completed by June 30th.

While no real decision can be reached at this Board meeting, staff does have a request. Staff requests that the Board conditionally approve the proposed equipment purchases and budget adjustments now, so that if ITTF actually approves any of them, the purchases can proceed quickly and not have to wait until the end of March when it would be too late.

Proposed Equipment

If there is approval to proceed on equipment purchases, there are several restrictions on how these funds are spent. This includes, but not limited to, the equipment must support an already approved program or project (no new projects) and must be an approved piece of equipment on the FEMA Authorized Equipment List. Additionally, the purchases must be made prior to March 31st and received no later than April 30th. This significantly limits what can be purchased. There was also a desire on the staff to wisely invest the money to enhance response capability and not just "buy to be buying." As a result, staff views this as an opportunity to acquire some equipment that in the past has fallen off of the priority list. Staff is proposing:

1. Special Teams

Purchase equipment that complies with the strategy and grant guidance to enhance the response capability of regional teams:

- a. Three Long Range Acoustical Devices (LRAD) for Mobile Field Force. Each MFF has an LRAD 500. LRADS are used for major events and for very long distance hailing. They are limited due to size and power demands. Six of the teams also have an LRAD 100 which is smaller and much more portable and closer in usage to a more powerful megaphone. These three would be for teams that do not have the 100.
- b. EOD Equipment requested by EOD Commanders (x-ray source material, mini pan disrupters and wire attack kits) which will enhance the use of the new NANO NexRay Portable X-Ray devices.
2. ILEAS Training Center Equipment - Replacement equipment and improved security system at the ILEAS Training Center to include a significant upgrade for our A/V capability. The A/V equipment will be designed to use both on site and off site (i.e., the conference).
3. Swap Out of Vehicles – ILEAS currently only owns two vehicles – A Ford Expedition and a large truck we received from IMERT. Staff has developed a plan to reorganize the vehicles we own. The plan is to either trade or sell the IMERT truck and replace it with a newer better tow vehicle for the various trailers that ILEAS possesses. That will give us two substantial tow vehicles. Additionally, staff is requesting the acquisition of an SUV for light towing and "people moving".
4. One Portable Shelter – In order to provide the capability of any ILEAS special team to self-sustain in field deployments for 72 hours, staff recommends the purchase of one inflatable shelter that sleeps 40. See more detailed description below.

Costs

LRADS	3 @ \$8,000 =	\$24,000
EOD	9 @ \$10,500 =	\$94,500
Vehicles	1 @ \$50,000	
	1 @ \$30,000 =	\$80,000
Shelter	1 @ \$150,000 =	\$150,000
ITC Equip	1 @ \$54,000 =	\$54,000
Shipping, etc.		\$7,500
Total		\$410,000

Keep in mind that these number are staff's best estimation of the real cost. When actual purchases are made, some may increase or decrease.

Mobile Shelter

It has been a long term project to make ILEAS special teams and large mutual aid responses self-sufficient for at least 72 hours with regard to transportation, food, water, communications and shelter. ILEAS has already solved the transportation, food, communications and water logistics but sheltering has eluded us to date. Law enforcement had in the past relied on the fire services to provide tents (commonly known as "tent cities"). This

has only occurred one time in the Southern Illinois floods of 2011. Staff and team commanders believe this plan has a flaw that assumes that fire won't need the shelters. It also costs more because trained staff must deliver and assemble the tents that MABAS has purchased. They request cost reimbursement for the use of the tent cities in exercises. It is also a potential problem for out of state deployments for disasters. Team commanders, primarily Mobile Field Force commanders, have wanted a sheltering solution for some time. However, it has been low priority from a funding perspective.

Given the current fiscal situation described above, this seems like a good time to invest on a sheltering solution. By purchasing the most expensive part of the shelter now, ILEAS has the option of adding on smaller, less expensive additions in following years. ILEAS has researched shelters in the past and determined that the best option would be the easiest to set up and logistically support. MABAS uses a brand known as Western Shelters which is a frame-type tent system. IMERT uses a style known as Zumro which is an inflatable sheltering system. ILEAS staff has determined that Zumro shelters are the way to go for ILEAS. The model we prefer is the Model 860 as show below:

This model can sleep 40 at one time. It is heated, air conditioned and has a shower attachment. The quote of approximately \$150,000 is turnkey solution which includes cots and a shower station. It is modular and can be attached to any other Zumro configuration for later expansion. IMERT already has Zumro shelters (already stored near the Training Center) so the potential for combining them into one large facility is possible. The plan is to keep our shelter at ILEAS in the warehouse in a trailer with the food and water logistical support to be deployed by one of the proposed tow vehicles wherever and whenever it is needed.

All life support equipment to sustain a field deployment where hotels are not an option for a period of at least 72 hours can be achieved. IMERT staff and the vendor will provide training.

Requested Board Action

Staff requests that the Governing Board approve the FY14 budget adjustments and equipment acquisition as proposed but conditioned on:

- The funds being available and approved by ITTF
- The purchases can be accomplished within the time frame as established by ITTF
- Staff, with the guidance of the Executive Officers, has the authority to customize the purchases so that they fit into the grant guidelines/requirements and whether or not they can be acquired before the termination date of the grants.
