

Federal FY 2019 Grant

The ITTF met on June 26th and unanimously voted to recommend the budget below to IEMA for the Federal FY19 grant process. FY19 will cover the period from July 1, 2020 through June 30, 2021. Homeland Security and Urban Area Security grants are combined in these numbers. For line items, see the report in the fiscal packet.

Mutual Aid	\$399,541.31
Training	\$825,366.20
Planning	\$1,310,128.22
Special Teams	\$2,672,287.37
Communications	\$1,005,301.05
IMERT	\$79,442.10
ITTF Support	\$154,137.84
Total	\$6,446,203.09

Please note that this is a 2% drop from budgeted FFY18.

Requested Board Action

Staff request that the Board:

1. adopt the Federal Fiscal Year 2019 as proposed; and
2. authorize staff to execute the required documentation to formally apply for and accept the grants

ILEAS FY20 Business Account

Please refer to the ILEAS Business Account in the Financial Packet. Janet Plotner will provide a description and will answer questions about the Business Account.

Requested Board Action

Staff requests that the Board approve the proposed ILEAS FY20 Business Account.

Final Unmet Needs Preparedness and Response Grant

At the May meeting, staff presented the State FY20 Preparedness and Response Grant (SFY20 PAR). The Board approved the pursuit of the grant funds. Staff promised to report back to the Board what the final numbers would be.

At this point, the budget that was proposed in the May report (below), were approved at the full ITTF meeting on June 26, 2019. The table below reflects what was approved.

Project	Cost per Unit	# of units	Total Cost	Description
Operational Expenses	DNA	DNA	\$14,000	To provide funds for ILEAS staff operational responses to the SEOC and to the field. The amount requested is less than half of last year
Mobile Field Force Trucks	\$41,666	3	\$125,000	Continue to replace Mobile Field Force trucks originally purchased in 2004. (3 last year, 3 this and 3 next year)
Bomb Suits	\$39,200	5	\$196,000	Five suits – 1 for IL SOS and four for local teams. This is a 2 nd year of a 3-year replacement process.
Headsets/Radios	\$1,800	100	\$180,000	When new respirators were purchased two years ago to replace the originals, new comms headsets were required. This completes the WMD Special Response Teams replacements.
ITECS Replacement Pilot	\$225,000	1	\$225,000	There are nine ITECS. They range in age from 13–15 years old. While they have been updated and maintained, eventually they will need replaced. This budget line item is intended to pilot ONE Next Generation of ITECS. Replacing the current configuration would be around \$400-500K. Intent is to pilot a version less than half that cost.
Chem and less lethal gear	Varies	Varies	\$37,500	This protective gear is not listed in the AEL. It is essential for responding to civil disturbances and WMD Special Response Team operations. It is expensive and outside the reach of most law enforcement agencies' fiscal capabilities. These supplies are necessary for training during basic SWAT and Mobile Field Forces.
LION Suits	\$2,100	100	\$210,000	Begin the process of a multi-year replacement process and to have extras to replace those used in operations.
Mobile Field Force Protective Gear	\$500	500	\$250,000	This protective gear is not listed in the AEL because of its potential use during civil disturbances. Additionally, the current protective gear is nearing replacement time.
Total Request			\$1,237,500	

Requested Board Action

Staff request that the Board:

1. adopt the SFY20 PAR budget as shown; and
2. authorize staff to execute the required documentation to formally apply for and accept the grants

State Fiscal Year Reimbursement Lag

Payroll Drawdowns

Starting July 1st every year, the State Comptroller will not accept any invoice for reimbursement that occurs after July 1st. This status continues through the end of September. Normally, ILEAS submits a drawdown request for salaries in each quarter to cover the next quarter. However, for the last four years, the shutdown meant that ILEAS could not submit in June for the salaries that are paid AFTER July 1. The request for reimbursement has historically been accepted by the Comptroller for payment in August and not paid until October or November. The bottom line is that ILEAS has had to utilize its Business Account funds to make payroll and use our line of credit to pay vendors. In 2017 and 2018, the result was that ILEAS was within a week of shutting down operations because we had exhausted our Business Account.

This year, however, IEMA and the State have changed policy allowing ILEAS to submit the drawdown for the post-July period ahead of time. As a result, ILEAS received – in June – four months of payroll funds to cover July 1 through October 31. A significant amount of pressure was put on the State by ILEAS/MABAS through a variety of means to solve the problem. This new policy has SIGNIFICANTLY reduced the stress on the ILEAS Business Account. It has also relieved stress amongst the employees about these near layoff situations.

Requested Board Action

No Board action is requested.

NARCAN Project Update

The original Naloxone grant from IDPH expired on September 30, 2018 but was extended to January 31, 2019. Once it expired on February 1st, IDPH did not immediately reissue the grant. As a result, ILEAS has spent what funds were available on additional NARCAN so as to have sufficient doses to resupply the agencies that had signed up and are in the program. In the May Board meeting, the Board authorized the spending of up to \$500,000 in NARCAN doses if the grant is awarded and the funds are forwarded to ILEAS. ILEAS received and executed the grant paperwork for \$702,104 as shown below:

- M&A \$62,424
- Staff \$135,674 (grant manager, LMS technician, RPCs, Fiscal)
- Travel \$5,259
- Naloxone \$428,205 (ILEAS already purchased 1,400 doses of NARCAN)
- Supplies \$5,503
- Database Development \$40,000
- Webinar \$5,000

The grant was backdated to February 1, 2019 so that expenses that ILEAS incurred by keeping the program alive during the inter-grant period have been reimbursed.

The scope of the grant has expanded to the entire state for fire and law enforcement. ILEAS is obligated by the terms of the grant to conduct a needs survey both in the original target area and then statewide as well. The target area survey directed to fire agencies has been completed. It should be noted that ILEAS has reached out and met with MABAS, the Office of the State Fire Marshall and IFSI to develop a working relationship with all three regarding this grant. MABAS particularly will assist ILEAS through their field operational staff, access to their member database and other support as necessary. It is anticipated that ILEAS will be reaching out to over 1,000 fire and 1,000 law enforcement agencies.

Requested Board Action

Staff requests that the Board give final approval to the most current version of the NARCAN grant.

Auditor Selection Process

A Request for Proposal (RFP) was submitted for auditing services from Certified Public Accountants for Fiscal Years 2019, 2020, and 2021. ILEAS has engaged the accounting firm of Martin Hood for the past three years, as was approved by the ILEAS Board in 2016. The scope of the RFP is for a single audit of the grant account and the audit of

the Business Account and the Foundation. ILEAS has been pleased with the past work completed by Martin Hood.

The Government Finance Officers Association (GFOA) has established a best practices document regarding the selection of government auditors. Part of the Association’s recommendation is the following: ‘Governmental entities should enter into multiyear agreements of at least five years in duration when obtaining the services of independent auditors. Such multiyear agreements can take a variety of different forms (e.g., a series of single-year contracts), consistent with applicable legal requirements. Such agreements allow for greater continuity and help to minimize the potential for disruption in connection with the independent audit.’ In hindsight, it should have been recommended by ILEAS Staff to enter into a 5- or 6-year agreement in 2016 with one accounting firm, instead of the three-year agreement. As was stated by the GFOA, continuity is an important factor in understanding the complexities of the client’s financial makeup.

Out of three firms, ILEAS staff received two responses from the Request for Proposal (RFP):

<u>Kemper CPA Group of Champaign</u>		<u>Martin Hood of Champaign</u>	
2019	\$22,000	2019	\$20,885
2020	\$22,400	2020	\$21,350
2021	\$22,800	2021	\$21,835

It is recommended that Martin Hood of Champaign be selected as auditor for ILEAS for Fiscal Years 2019, 2020 and 2021. In the staff’s judgement, these are multiple reasons for accepting the Martin Hood proposal:

- MHFA has a significant pool of resources for other services as well. For instance, the Foundation used MHFA when it established itself.
- It benefits ILEAS to have a local auditor to encourage closer communications and support.
- Another GFOA best practices recommendation is that the selection of an auditor should be based on quality of work and not solely on cost. In this case the cost happens to be less than the other proposal. MHFA is one of the best and most respected accounting firms in East Central Illinois with a history of quality reporting in the public sector. Again, ILEAS and Martin Hood have a very good working relationship, and can look at Martin Hood for answers to questions even when it is not the during the audit.

Requested Board Action

Staff requests the Board select Martin Hood as the ILEAS auditor for the fiscal years of 2019 to 2021.

Special Teams Equipment Purchase Authorization Request

Board policy requires staff to get authorization for acquisitions exceeding \$100,000. Pursuant to and as described in the State FY20 ILEASPAR grant above, staff requests authorization to purchase the:

- Mobile Field Force Trucks \$125,000
- Bomb Suits \$196,000
- Mobile Field Force Protective Gear \$250,000
- Lion Suits \$210,000

The trucks, the bomb suits and the LION suits all have long lead times (20+ weeks). Staff desires to get the orders made as quickly as possible.

Staff also requests the Board also authorize \$331,222 to purchase:

1. WMD Special Response Team headsets
2. Replacement Special Response Team Radios
3. Headset/Radio Connectors
4. MABAS Replacement Radios

The funds for this COMMS acquisition comes from:

- 16ILEASSRT2 (ends 8/31/19)
- 17ILEASCOM (ends 10/30/19)
- 17UAILECOM (ends 10/30/19)
- 18UAILECOM
- 18ILEASCOM
- 20ILEASPAR

Requested Board Action

Staff request that the Board authorize the purchase of the equipment as described above.

Bleeding Control Kits Update

As we have previously reported, Illinois Terrorism Task Force (ITTF) created a school safety subcommittee that has made several recommendations to the Governor of Illinois regarding steps to prevent shootings from occurring as well as improving the response capabilities statewide for public safety and the schools. One of those recommendations was the implementation of the officially recognized STOP THE BLEED program. This project consists of two parts, 1) acquiring the Bleeding Control kits and distributing them to schools, and 2) training school staff to use the kit and, if unavailable, how to improvise to stop life threatening bleeding. The ITTF voted in December to provide grant funds to purchase kits for every school in Illinois.

Pursuant to the grants and Board approval, ILEAS purchased 7,856. Of this amount, 216 are being held back for assignment to special teams' vehicles of ILEAS and other disciplines, staff and team members. The remaining 7,640 are slated to be distributed to public schools across Illinois. ILEAS has also purchased \$28,251 worth of training materials to support the Stop the Bleed trainers.

Additionally, the Board authorized the hiring of a Medical Program Organizer. ILEAS hired Barb Oliff, a nurse educator with IMERT. She has already been deeply involved in the training and kit distribution. On July 10, 2019, Barb Oliff, Kent Jepsen, Chris Jansen and one other IMERT volunteer took 4,100+ kits to Springfield and distributed them to representatives of the Regional Offices of Education from across Illinois (all but one). The ROEs are expected to distribute them to the individual districts in their Regions. Additional kits (up to 5 per instructional building) are available to districts that train more staff. ITTF is determining a budget for shipping from ILEAS to the districts for the additional kits once they qualify.

Pursuant to a request from ITTF, ILEAS notified its membership about the potential of certifying officers/deputies as Stop the Bleed trainers. As a result of that notification, a significant number of agencies responded that they are interested in their School Resource Officers to become trainers. Barb Oliff is working with those agencies to arrange training. The first session will be on August 8th at the ILEAS Training Center. Other sessions around the State will be available in the near future.

For the Board's information, ILEAS has established a resource website at <https://www.ileas.org/stop-bleed>. Please let other law enforcement executives in your regions know about the program and the website.

Requested Board Action

No Board action is requested.

ISP BAO LMS Project

As the Board is aware, ILEAS entered into a Memorandum of Understanding (MOU) with the Illinois State Police regarding Breath Alcohol Operator recertification. ILEAS/ISP entered into an MOU in February of 2019 lasting until December 31, 2019 to provide LMS services for Breath Alcohol Operator recertifications and for HAZMAT Awareness. The pertinent facts at this point are:

Breath Alcohol Operator Recertification

- ISP operates an LMS system, SABA, which is very old, unsupported by the vendor and was failing
 - The original SABA system project cost approximately \$1,300,000
 - ISP was hundreds of operators behind in getting recertifications completed and documented and needed assistance as soon as possible
- The MOU – for no cost – provided for ILEAS making its Topyx LMS available to ISP for Breath Alcohol Operator recertification
- The assumption at the time was that the recertification data from the ISP SABA LMS system could be downloaded and then uploaded into Topyx for operators to use
- The reality turned out to be very different.
 - The data from SABA was no less than 40% inaccurate. Inaccuracies included - operators not even in the system, the expiration dates were inaccurate, newly certified operators not being entered in, operators that did complete the online training were issued improper documentation, etc.
 - Operators were not always able to complete the training once in the SABA system. If they did complete the training, SABA would not issue the required certificates.
- The result was that ILEAS was unable to move the data from SABA into Topyx forcing staff and Indilus to quickly build an API software system where we could start over and enter operators one at a time.
 - A software program was written that allowed ILEAS staff to pre-enter the operators that expired that month. Then the sheriffs/chiefs could update their operators with more accurate data. *This system allows the sheriffs/chiefs to enter their officers into the LMS system from their ILEAS system behind their password so that they do not have to learn a new system, have a new account or a separate password.*
 - This involved over 1,000 emails and phone calls between ILEAS staff and local agencies, chiefs, operators, etc.
- The recertifications last three years. Every month a couple of hundred expire. In order to keep the volume to a workable level, ILEAS staff have been working on a month at a time. In other words, for this to be completely caught up, it will take a total of three years which does not include the work to get the newly certified new operators into the system when their basic training is completed. That methodology leaves a rolling balance of operators with expired licenses which is unacceptable. To bring all the outstanding operators into compliance with the three-year rule over 2,700 operators will need to be contacted. A significant number of which will have incorrect information which will have to be dealt with on a “one-at-a-time” basis.
- Virtually all of the State Police troopers are operators as well. They will, in the near future need to be recertified.
- A significant amount of work has yet to be done in order to complete a system that is efficient, effective,

legally defensible and more easily managed. This includes:

- providing the capability of BAO instructors to directly enter in new operators, build a management system (dashboard, queries, report) for ISP to fully fulfill its statutory responsibilities, tools for chiefs/sheriffs – and ISP itself - not only to enter/update their operators/officers/troopers, but to monitor or change their status (retired, reassigned, one officer working for multiple agencies, etc.) as time moves on
- build the capability to easily respond to subpoenas, FOIA requests, analyze the data, track changes in curriculum, etc.

HAZMAT Awareness

- ISP desires to provide its HAZMAT awareness curriculum to every officer in the State and every agency wanting to take advantage of that training at no-cost.
 - At the ILEAS Conference in March 2019, HAZMAT Awareness was identified as the #1 priority curriculum for ILEAS' LMS.
- Implementation of the HAZMAT Awareness online curriculum is less complex than the BAO recertification; however, it is at a significantly higher volume. Where there are over a thousand operators, there are tens of thousands of potential HAZMAT users.
- Many of the tools built for agencies to enter their operators into the LMS system through their ILEAS web page for BAO, will also work for the HAZMAT.
- In order to implement BAO recertification and HAZMAT Awareness and do this correctly so that it is done professionally, easy for the users and never falls back into the disorganization it once was, it is going to take a concerted effort and an investment both in terms of staff and programming. Staff will be necessary to support users. Programming will be necessary to keep the number of staff required to a minimum.

Proposal

ISP and ILEAS management have personally met and had phone conferences several times over the last few months regarding this problem. After reviewing the problem and developing a list of needs which will – in ILEAS' opinion – get everyone to Last week, ILEAS sent a proposal to the State Police on July 16th for a long term solution. ILEAS made a proposal to the State Police to extend the MOU, complete the project and oversee the management of the system for the next five years. ILEAS proposed a first year cost of \$290,000 and \$200,000 annually afterwards. On July 19th, ISP contact ILEAS stating that was over their expectations. They requested more information and the discussions are ongoing.

Requested Board Action

No Board action is being requested at this time.

2019 Flood Fight

As all Board members are aware, ILEAS resources were utilized in Southern Illinois to support local agencies during the significant flooding that occurred in May and June of 2019. At IEMA's request, ILEAS staffed positions in the State Emergency Operations Center in Springfield and the State Unified Area Command in Winchester, Illinois. Responding officers provided force security, patrol and levee protection duty in Morgan, Monroe, Jersey and Calhoun Counties.

ILEAS utilized the services of the following teams:

- Region 9/11 WMD Special Response Team
- Region 6 Mobile Field Force Team
- Region 8 Mobile Field Force Team

- Region 6/7 Special Response Team
- Region 4N Mobile Field Force
- R7 Mobile Field Force
- Region 8 Special Response Team
- NIPAS Special Response Team
- North Special Response Team

Several non-team agencies also responded to requests for mutual aid as well. For a complete list and map of agencies responding to requests for mutual aid, please see the end of this document.

ILEAS is still collecting data on costs. IEMA will compile all the expenses and then apply for Federal assistance. If FEMA approves Illinois’s request, then ILEAS will gather and submit all the appropriate expenses incurred during the deployments and submit an invoice to IEMA. Once a reimbursement decision is made by FEMA/IEMA, ILEAS will receive the funds and distribute them to the participating agencies. Please note that FEMA reimbursements (Stafford Act) are normally paid out at 75% of the total cost. Staff will keep the Board informed of the progress of this process. To date, agencies have submitted requests for reimbursements as shown below:

Straight Time	\$82107.27
Overtime	\$158464.11
Backfill	\$19507.04
Medicare	\$3771.14
FICA	\$5873.89
Personnel Total	\$271,627.83

To date, 80% of the responding agencies have submitted their claims. Staff anticipates that within a week all the agencies will have completed the request form. **A total of 94 agencies and 157 officers/deputies responded.**

ILEAS incurred expenses as well. Fortunately, the FY19 Preparedness and Response Grant (PAR) paid for a significant portion of ILEAS’ response. These costs cover deployed staff salary and travel. A total of \$30,525.99 in expenses were incurred by ILEAS. 20ILEASPAR paid for \$24,721.50. ILEAS submitted to IEMA that we incurred the remaining \$5,804.49.

Requested Board Action

No Board action is being requested at this time.

2020 Democratic National Convention Milwaukee, WI

The 2020 National Democratic National Convention will take place in Milwaukee, Wisconsin on July 13-16, 2020. Milwaukee Police Department reached out to ILEAS to discuss their upcoming request for assistance during the Convention. A formal letter requesting assistance is forthcoming. ILEAS has talked to Chicago Police, Illinois State Police and IEMA about this deployment as well. More will follow on this as time progresses.

Requested Board Action

Staff requests that the Board authorize staff to negotiate with the City of Milwaukee in concert with other Illinois assets regarding the deployment of Illinois law enforcement assets for the 2020 Democratic National Convention.

ILEAS Training Center Activity Report 2019

July 24 -26	IDOT Leadership Training
July 26	Head Start Training
